

# PRODUCT DATA SHEET:

## WHITE WAVES

### PRE-POLYMER ART PIGMENT

#### 50G

White Waves is a high quality prepolymer pigment. The heavy body paste consistency provides a rich colour effect with rapid and uniform dispersion into clear polymer resins.

- Pre-polymer pigment
- Water resistant
- Excellent light fastness rating
- Concentrated formula
- Supplied in 50g pots
- Compatible with various clear resins\*

\*not all resins have been tested. Please stop use immediately if any unusual reactions occur and get in touch to let us know.

The chemistry of the pigment formulation shows remarkable results in creating cell effects on its own (tests conducted with Glass Cast 3 resin).

The White Waves pigment has a light fastness index of 6. The pigment is opaque.

#### HOW TO USE IT:

Mixing & Application: Mix a small amount of pigment into your resin, no more than 10 parts per 100.

#### SAFETY:

Refer to the Material Safety Data Sheet for information on correct handling and application of the product.
